DECEMBER 2026

Preparing for Every Season

As Nevada transitions from wildfire season into winter, NV Energy's Power Safe NV program remains focused on protecting communities and supporting reliable electric service throughout the year.

While Power Safe NV is designed to reduce wildfire risk, many of the program's initiatives, like proactive vegetation management, infrastructure upgrades, system inspections, and strategic de-energization efforts, also help strengthen the electric system against severe winter weather and other year-round threats. In 2026, NV Energy completed targeted vegetation management and rebuilt overhead power lines in higher-risk areas to enhance reliability ahead of the winter season.

With forecasts indicating the potential for an El Niño weather pattern, Nevada could experience increased impacts from winter storms in the north and more frequent or intense precipitation events in southern Nevada. Investments made through Power Safe NV help strengthen the electric system against a range of seasonal threats, supporting reliability and community resilience year-round. Update Your Information

Don't miss out on immediate information and updates about your account and services. Log on to MyAccount and select Profile and Preferences. There, you can ensure your contact information and notification preferences are up to date. Outage, payment, and other alerts are available via email, text and voice message. Get started at **nvenergy.com/myaccount**.

Outage Preparedness

NV Energy wants you to be prepared. Sometimes power outages occur due to events that are beyond our control, like extreme weather events and vehicle accidents involving utility equipment. While we will always work to restore your power as quickly and safely as possible, it is helpful to be prepared in case the lights do go out, especially if you are in an area prone to extreme weather conditions. Visit **nvenergy.com/outageprep** for tips.

Predictable Monthly Payments

Take charge of your budget and know your energy costs for the month ahead of time with our Equal Pay service. We'll average the last 12 months of energy usage at your home to determine your monthly payment amount, so you have additional predictability when it comes to your finances. Learn more and see your estimated monthly payment at **nvenergy.com/equalpay**.
