- Find ways to save energy and money
- See new programs and incentives that can increase your savings
- Check your account status and latest payments
- See how the weather affects your usage
- Compare your energy usage to other homes of the same size
- Complete a detailed Energy Audit

Increase Efficiency with an AC Tune Up

In southern Nevada, your air conditioner requires proper maintenance to perform at peak efficiency. By tuning up your system, you could maximize its energy efficiency and save money.

Are you ready for a bigger change? When you switch to a more energy efficient system you might be eligible to receive a cash rebate.

Certain restrictions apply. Call (702) 402-1111, email acprogram@NVEnergy.com or visit our website at NVEnergy.com/AC for more details.

This offer is for southern Nevada customers only.

Visit NVEnergy.com today and register online for MyAccount.

Southern Nevada's Cool Share

More than 39,000 NV Energy customers are proving that there is power in numbers. As more people sign up for this program, collectively we'll help keep electricity rates low and reduce our impact on the environment. To date, Cool Share customers have saved 65.2 MWh of energy which reduces carbon emissions equivalent to taking 8,500 cars off Nevada's roads.

Call 702-402-1111 to enroll today.

This offer is for southern Nevada customers only.

Energy Saving Tip

To help you stay cool and reduce the amount of electricity you use for air conditioning, ceiling or room fans keep the air moving. When using a ceiling fan, have the fan moving in the down position, blowing air down and across your skin which creates a cooling effect.

Enjoy a More Energy Efficient Pool

Did you know a single-speed pool pump is typically your home's second-largest energy consumer behind your air conditioning system? This pool season, replace your single-speed pump with a variable-speed pump and you could save up to 80 percent in energy costs. Variable-speed pumps run cooler, quieter and more efficiently, saving you money on energy bills every month.

Upgrade now with instant rebates on efficient pumps from NV Energy. The NV Energy Efficient Pool Pump Rebate Program is offering an instant rebate on variable-speed and two-speed pumps. Simply ask your pool service professional or visit a participating pool supply retailer or distributor for advice on which pump is right for your pool.

For more information on pool pump rebates – and to get a list of participating retailers, distributors and pool builders – please visit NVEnergy.com/poolpumps.

This offer is for southern Nevada customers only.
