

# Take Control – Save Money and Energy

Learn more at [NVEnergy.com](http://NVEnergy.com)

## It's Electric and Easy

Electric Check, an automatic payment option, enables you to pay your power bill with an automatic withdrawal from your checking or savings account. There is no easier way. No checks, stamps, fees, hassle, or waiting in line.

Electric Check is open to all residential and commercial customers with a current account and no more than one returned check in a 12-month period.

Visit [NVEnergy.com](http://NVEnergy.com)  
to register for this service.

## Energy Tip

### Water Heater Calculator

You can calculate how much it costs to run your electric water heater on MyAccount at [NVEnergy.com](http://NVEnergy.com). See My Home for your Home Profile. You can find out how much you can save by installing a new energy-efficient water heater. Additional tips are available for weatherization, lighting, heating and cooling.

*Nevada Wildfire Awareness Week will be held in May. To help our customers prepare for the fire season, please visit the University of Nevada's Cooperative Extension's website, [livingwithfire.info](http://livingwithfire.info), or call your local fire agency.*

## Natural Gas Safety

While NV Energy is responsible for maintaining natural gas equipment to the point of and including our meters, our gas customers in northern Nevada should be aware that the natural gas piping between the meter and gas equipment in the home is the responsibility of the property owner.

Because underground natural gas piping is often metallic and may corrode or leak if not properly installed or maintained, it is recommended that you have the piping periodically inspected.

Don't forget to inspect the underground natural gas piping to a shop, pool heater or other living quarters. If you notice

that your shrubs and grass near your underground natural gas piping turn brown and die and/or the soil turns dark brown or black — you may have an underground natural gas leak. Please be advised that you may not be able to smell an outdoor natural gas leak because the odorant added to natural gas will be filtered out as it passes through the soil.

There are local plumbing or heating contractors available to help in determining where these lines are located and to perform inspections or repairs. Any unsafe condition discovered in buried customer piping should be repaired or corrected immediately.

Stay safe, if you are considering installing buried piping between NV Energy's meter and other natural gas equipment; be sure to hire a licensed contractor to ensure all work will be completed in accordance with all state and local codes governing gas piping systems.

## Cool Share for Southern Nevada Customers

More than 39,000 NV Energy customers are proving that there is power in numbers. As more people sign up for this program, collectively we'll help keep electricity rates low and reduce our impact on the environment. To date, Cool Share customers have saved 65.22 MWh of energy which reduces carbon emissions equivalent to taking 8,500 cars off Nevada's roads.

**Call (702) 402-1111 to enroll today or online at [NVEnergy.com/coolshare](http://NVEnergy.com/coolshare)**

For southern Nevada customers only.

## Lower Your Heating Costs

Northern Nevada customers, you can save on energy use by replacing your gas furnace. You could make your home more comfortable, energy-efficient, and you also might qualify for a cash rebate.
