October 1, 2009 Nevada residential electric RATES

Sierra Pacific Power d/b/a NV Energy Electric Rate Schedules for Residential Customers

The Public Utilities Commission of Nevada (PUCN) recently authorized changes to certain components of electric rates, which has resulted in a decrease in the total rate. These changes became effective on **October 1, 2009.**

NV Energy's rates shown here are in addition to any Local Government Fee or taxes based upon revenue or quantity of energy sold. These taxes are imposed upon the utility by the local governments within our service territory.

In addition, the Customer will also be billed for the Universal Energy Charge of \$0.00039 per kWh of usage with monies going to the State of Nevada fund for energy assistance and conservation as set forth in NRS 702.010 to 702.282.

The rates contained in this schedule are for bundled rates. Bundled rates are the combination of all the services necessary (generation, transmission and distribution) to deliver reliable electric power to retailend–use customers. Distribution Only Service is available to certain eligible customers who meet the provisions set forth in chapter 704B of the Nevada Administrative Code.
