Powerful Results through RenewableGenerations

The RenewableGenerations incentive program from NV Energy helps customers offset the installation costs of renewable energy systems. Through our program, we've installed 4.17 megawatts of solar, small wind turbine and micro hydro systems for customers' homes, small businesses, agriculture properties, school or public buildings.

Customers across Nevada can save money with a one-time installation rebate from NV Energy. To date, more than \$15 million for installation rebates for projects across the state has been paid.

The 4.17 megawatts will avoid an estimated 5,989 metric tons of carbon dioxide emissions. This is equivalent to the greenhouse emissions from 1,145 passenger vehicles each year or the CO₂ emissions from 673,733 gallons of gasoline consumed.

Help us protect the environment when you participate in the RenewableGenerations program. Applications are now being accepted for our wind and hydro systems.

The Nevada State Capitol is a unique example of a 5.933kW system installed on a historical building in June 2009. NV Energy paid a rebate amount of \$29,665 through its program.

Working Near Overhead Power Lines

Arrangements will be made to assist you in doing work near overhead power lines safely and in compliance with Nevada law. In Nevada, Call Before You Crane at (702) 227-2929 at least five days before beginning work.

Online Tools with MyAccount

MyAccount gives you easy to use tools to assist in evaluating and managing their energy use and determining which energy conservation programs are right for you. Features include:

- Paperless Billing
- Pay your bills online immediately
- See 24 months of your previous energy use
- Get conservation tips customized for home or business
- Check your account status and latest payments
- Analyze and graph your energy use
- Find ways to save energy and money
- See how the weather affects your use
- View your energy use month to month or year to year
- Compare your energy use to other homes of the same size
- Complete a detailed Energy Audit

Low Cost Energy Tips

Here are a few low cost, easy projects or steps you can take to save another 10 – 25 percent on your energy bill.

- Plant trees and shrubs on the south and west side of your residence. The vegetation acts as insulation and provides shading, reducing heat in a building.
- Fix leaky faucets and install low-flow showerheads.
- Use room fans to keep the air moving and reduce the feeling of heat in your home.
- Check the seals on your refrigerator and freezer.
- Consider buying a cover for your pool to retain heat in the water.

Avoid the Dreaded Paper Cut

To sign up for Paperless Billing, register for MyAccount at NVEnergy.com. Your fingertips will thank you.
