

## In Southern Nevada Stay Cool All Summer with CheckMe!® Plus

Instant rebates up to \$1,000 for qualified systems. No paperwork!

Program includes:

- Replacing an inefficient air conditioner or heat pump with a high-efficiency unit
- Installation of a specialized cooling control (WCC™) designed for the Las Vegas climate\*
- Duct testing and sealing\*

**Visit our website at [nvenergy.com/AC](http://nvenergy.com/AC)**

\* The rebate for installation of specialized cooling control (WCC™) and Duct Testing and Sealing may cover the entire cost of the service, depending on contractor.

## We Pick Up Your Old Fridge... and You Pick Up \$50

Your old refrigerator uses up to four times the electricity of a new one. So, why not recycle it? You could save up to \$140 a year on your energy bill. We'll even haul it away free of charge and give you \$50. To participate, your refrigerator must be in working condition.

**Call 877-289-8260 to schedule a pick up.**

## Solar Pool Heating Incentives for Nonresidential Customers

NV Energy now offers incentives to nonresidential customers who invest in solar to heat their swimming pools. Solar pool heating systems are one of the most cost-effective applications of solar heating technology available and an economical way to extend the swimming season for seasonal pools or cut costs for pools that are heated year round. Businesses such as hotels, resorts, health clubs and schools are perfect candidates for solar pool heating. Traditional pool heating for these types of facilities could mean thousands of dollars in annual energy cost. Investing in a solar pool heating system can greatly reduce those high overhead expenses.
