

Help for Seniors

The Senior Energy Assistance Expo returns this summer – helping income-qualified seniors age 62 and older in southern Nevada apply for Project REACH energy assistance to help pay a past-due bill on an active account. Information on other senior programs and services will also be available. Eligible customers are encouraged to attend the Expo on August 5, 2017 between 8 a.m. and 12 p.m. at Cashman Center, 850 N. Las Vegas Blvd., Halls A & B. More information, including details about Project REACH eligibility and the application process, is available at nvenergy.com/help or by calling (702) 402-5200.

Tree Trimming

Power outages can occur when tree branches rub against or fall onto power lines. In order to help protect you and your property, we offer trimming services on trees growing into or near high voltage lines. Request services in northern Nevada at (775) 834-4444 or in southern Nevada at (702) 402-5555. Learn more at nvenergy.com/safety.

Power in Your Hands

We know you're busy. That's why we've put the power to manage your account directly in your hands. With our mobile app, you can monitor your usage, pay your bill, see outage information and more – all from your mobile device, anytime, anywhere. Download it today through the iTunes App Store or Google Play.

Did You Know?

NV Energy customers like you benefited from \$3 million in savings from the Energy Imbalance Market (EIM) in the final quarter of 2016. Not only does the EIM optimize the power grid and find lower-cost energy for customers of participating companies (like NV Energy), but it uses excess renewable energy before conventional generating resources when available.

Call Before You Dig

Spring has sprung and you may be considering a home improvement job, gardening project or deck installation. Whatever your plans, remember to call 811 before you or your contractor begin digging. The depth of utility lines varies, and the safety and utility service of you and your neighbors depends on marking underground lines to prevent accidents and outages.

**Know what's below.
Call before you dig.**

Time of Use

If your schedule allows you to use most of your energy during the summer's off-peak hours, consider our Time of Use (TOU) program for extra savings. Peak times vary between northern and southern Nevada, but occur during the summer months when the weather is hottest and electricity use is greatest. Customers willing to reduce consumption during these times could save money on their bill. Learn more, including peak times for your service area, at nvenergy.com/tou.
