

NV Energy

is your partner in **saving energy** and **money**.

MyACCOUNT

NV Energy's online tools, combined with our energy efficiency programs, make it easier and more convenient for you to manage your energy use. And they can help you save money. Log into **MyAccount** from your personal computer, or

download our mobile app from iTunes or Google Play, to get up-to-date information on how much energy you're using and its costs. We'll also send you a weekly summary to help you keep track from week to week.

MORE OPTIONS, LESS HASSLE

Paying your bills online is more convenient than ever. Set up automatic monthly payments from your bank account or enroll in **Paperless Billing**. We'll notify you monthly by email when your bill is ready to view online. This option also gives you access to the features available in MyAccount. NV Energy offers other ways to take the hassle out of paying bills. You can pay through our website, **Check-By-Phone**, or over the phone using a credit card or ATM card (there's a processing fee for this option).

Of course, you can pay by mail. Every bill we send includes a pre-addressed envelope, although you'll need to add the postage stamp. Or you can pay in person at an authorized **Shop & Pay** or kiosk location and the payment will be posted to your account the same day. More than 220 supermarkets and drugstores statewide offer this service. They're all listed on our website at nvenergy.com/paymyway.

SEE THE FUTURE

Take the guesswork out of budgeting. With the **Equal Payment** plan we take your previous year's average power usage and divide it into equal monthly payments so you'll know what your bill will be each month. **Select Your Due Date** to choose which day of the month you want your bill to be due.

LOWER YOUR BILL WITH POWERSHIFT BY NV ENERGY

PowerShift by NV Energy puts more money in your pocket - and using less energy doesn't mean you'll have to be less comfortable. Go to nvenergy.com/powershift to learn more about the products and services we've included here.

SMART THERMOSTAT

The **PowerShift Smart Thermostat** service is the smart, simple way to make your home comfortable - and save up to \$100 a year on your heating and cooling bill. The smart thermostat's innovative energy efficiency technology makes small adjustments to your target temperature and learns your preferences, so you save around the clock. Get up to four free, smart thermostats that help your A/C run more efficiently. The Smart Thermostat service comes with a free mobile app, too, so you can control your home's temperature from anywhere - at work, on vacation, or even from the comfort of your couch. Create custom

heating and cooling schedules, or 'set away' when your day changes. Why is the Smart Thermostat service free? We ask participants to reduce their energy use on certain hot summer days, when demand for energy is high. This helps us ensure cost-effective electricity for everyone, from sources that are better for the environment. For more information about the Smart Thermostat for residential customers, call 855-676-9373 or visit nvenergy.com/smarthermostat.

HOME AIR CONDITIONING SERVICE

Tuning up your air conditioning system improves comfort and reduces costs – especially during the summer when more energy use means higher bills. The PowerShift Home Air Conditioning service offers technical expertise and instant discounts that can improve your home's heating and cooling efficiency by up to 20 percent, lower your bills and increase the reliability of your equipment. This service is available in southern Nevada only. Learn more at nvenergy.com/ac.

HOME ENERGY ASSESSMENTS

PowerShift by NV Energy offers free home energy assessments to help you reduce the amount of energy you use in your home by providing personalized conservation recommendations. During the assessment, a PowerShift energy advisor reviews your billing and energy usage history then performs a walk-thru of your home to evaluate the efficiency of appliances and major systems that contribute to high energy usage. The assessment also includes an inspection of window seals and doors, a review of attic insulation levels, duct work, refrigerator temperatures and more. The auditor then goes over the findings with you and

provides specific tips to help you lower your energy consumption. Call 702-402-5555 in southern Nevada or 800-962-0399 in northern Nevada to schedule an appointment with one of our PowerShift energy advisors.

HOMEMADE RENEWABLE ENERGY

Our online tools and energy efficiency programs are great options to save you energy and money. If you're interested in taking your savings to the next level, we also have rebates to offset your costs for investing in renewable energy. NV Energy's **RenewableGenerations** program offers rebates to customers who install solar panels or small wind turbines to generate some of their own electricity.

You can also earn rebates for using solar energy for home heating or hot water. Agricultural and Native American Tribal customers may also qualify for rebates for small hydroelectric installations. Visit nvenergy.com/renewablegenerations.
