

NV Energy

is your partner in **saving energy** and **money**.

We're putting all of our energy into your energy.

BUSINESS SOLUTIONS CENTER

NV Energy's **Business Solutions Center** is staffed with a team of dedicated contact center agents highly-trained to quickly resolve account issues specific to our small to midsize business customers. In addition to providing friendly and

knowledgeable customer assistance, the Business Solutions Center also offers value-added web services. Learn more by contacting the Business Solutions Center anytime between 7 a.m.-6 p.m., Monday through Friday:

Las Vegas Local: 702-402-1000
Reno Local: 775-473-6998
Toll Free: 877-377-6387
BusinessServices@nvergy.com

MyACCOUNT

NV Energy's online tools, combined with our energy efficiency programs, make it easier and more convenient for you to manage your energy use. And they can help you save money.

Log into **MyAccount** from your personal computer, or download our mobile app from iTunes or Google Play to get up-to-date information on how much energy you're using and its costs. We'll also send you a weekly summary to help you keep track from week-to-week.

NV ENERGY APP

Stay on top of your facility's energy use with the **NV Energy app**. Our app updates your cost-to-date information daily, and projects what your bill will be for the current month. You also have the ability to pay your bill from your mobile device, or search for the nearest of more than 200 payment locations statewide.

The NV Energy app delivers outage information and notifications as well. You can choose to have our Outage Center keep you updated via email, text or phone call. Also, our map feature provides statewide outage information that is updated frequently.

EQUAL PAYMENT

Avoiding spikes in energy bills can help with budgeting for your business. With the **Equal Payment** program, NV Energy will take your average power usage from the last 12 months and divide it into equal monthly payments. This option allows you to know in advance what your bill will be each month.

With Equal Payment, your bill will show exact meter readings for the month and costs that would normally be due, allowing you to compare the cost of your actual usage to the monthly equal payment amount. If you determine that the plan is not right for your business, you may cancel at any time by contacting our Business Solutions Center.

SELECT YOUR DUE DATE

Another tool that can help with budgeting for business expenses is our **Select Your Due Date** option. This allows you to specify the date that you feel is best to pay your power bill each month. It's simple, just contact NV Energy's Business Solutions Center and we'll take it from there.

POWERSHIFT COMMERCIAL ENERGY SERVICES

The most controllable operating expenses for many small to midsize businesses are energy costs. PowerShift by NV Energy's **Commercial Energy Service** helps commercial customers exercise this control and save on energy bills. This service offers businesses cash incentives and technical assistance for installing eligible energy-efficient equipment. In some cases, NV Energy will pay up to 90 percent of project costs. If you qualify, your business will receive a free facility assessment, detailed proposal, and equipment installed at a low rate. For a list of approved contractors and potential financing options, visit nvenergy.com/commercial.

POWERSHIFT SMART THERMOSTAT FOR COMMERCIAL

For commercial customers, the **PowerShift by NV Energy's Smart Thermostat Commercial service** can help lower your electric bill, reduce your impact on the environment, and provide innovative technology to improve your facility's energy management. There are also incentives available for participating in the program. As part of the Smart Thermostat Commercial service, NV Energy develops a solution tailored to the size of your facility and its energy management system that reduces your energy consumption during times of peak demand. We also provide load-reducing equipment to your business at little or no charge. Whether your facility utilizes building management systems, standard thermostats or rooftop HVAC units, the Smart Thermostat Commercial service can help you conserve energy and lower costs.

NONPROFIT AGENCY GRANT

Retrofitting projects that improve electric energy efficiency for your nonprofit could be fully funded by NV Energy. This includes installing a new heating and air conditioning system, efficient lighting controls and more. Individual projects up to \$5,000 may be eligible to receive 100 percent funding, while projects between \$5,000 and \$10,000 may be funded up to 50 percent if your nonprofit matches the investment.
