

Right Tree, Right Place.

Moana Nursery and NV Energy are partnering in an educational campaign to encourage home owners, businesses and everyone to plant the *Right Tree in the Right Place*.

NV Energy

Providing safe and reliable power to our customers is our main goal. To help us reach that goal, we encourage property owners to select only the most suitable tree varieties and planting locations where the trees can thrive and never grow into the power lines.

Moana Nursery

Offering expert advice and a variety of quality trees that are appropriate for every location is Moana Nursery's goal. We can help you select the most appropriate varieties that will fit *your space* and won't grow into power lines, adding beauty to your landscape.

Through a cooperative effort, NV Energy is removing three ash trees from the nursery property at Moana Lane. Planted forty years ago, these trees have grown dangerously close to existing power lines. Rather than continually prune the trees away from the power lines, Moana has partnered with NV Energy in a demonstration of *Right Tree Right Place*. The existing trees will be replaced with appropriate ornamental trees which will mature under, not into, the power lines.

Moana Nursery is taking this opportunity to further beautify our property with new varieties of shrubs, perennials and groundcovers for our customers to enjoy.

If you are planting a tree – You too can be part of the *Right Tree Right Place* campaign. Our knowledgeable staff is here to assist you in finding the perfect tree for your needs.
