Net Metering RATES

July 1, 2016

**Nevada Power Company
d/b/a NV Energy
Electric Rate Schedules for
Net Meter Customers**

The Public Utilities Commission of Nevada has authorized a decrease in Nevada Power’s d/b/a NV Energy rates effective **July 1, 2016**. The following rate schedule shows the actual changes in rates.

NV Energy’s rates shown here are in addition to any Local Government Fee based upon revenue or quantity of energy sold. These taxes are imposed upon the utility by the local governments within our service territory.

In addition, the Customer will also be billed for the Universal Energy Charge of \$0.00039 per kWh of usage with monies going to the State of Nevada fund for energy assistance and conservation as set forth in NRS 702.010 to 702.282.

The rates contained in this schedule are for bundled rates. Bundled rates are the combination of all the services necessary (generation, transmission and distribution) to deliver reliable electric power to retail end–use customers. Distribution Only Service is available to certain eligible customers who meet the provisions set forth in chapter 704B of the Nevada Administrative Code.
