

Kick Off Your 2017 Projects:
Contractor Network Newsletter

Get All The News About **Commercial Energy Services**

Contractors Corner

2017 is off to a strong start! Thanks for your interest and participation in Commercial Energy Services. Our outreach team understands the unique needs of Nevada's contractors and customers. The team can help with all aspects of a project, including:

- Getting your staff up to speed on Commercial Energy Services, rebates

and how to submit an application.

- Discussing what equipment qualifies for rebates.
- Exploring energy-efficient options for various customers from large facilities and nonprofits to small businesses.
- Making sure your customers' applications include all of the required supporting documentation.

In addition, each qualified company participating in the Contractor Network has been assigned a PowerShift energy advisor as a direct contact. If you have questions about your energy advisor contact or have inquiries on an energy-saving project, please contact Wendy Ayers.

Good To Know

In January, we kicked off 2017 with events in Reno and Las Vegas that included the latest incentive offerings, informative breakout sessions and networking opportunities. To download the 2017 applications, all of the supporting materials and the event's presentations, visit our website at www.nvenergy.com/commercial. COMMERCIAL CUSTOMERS SAVE WITH POWERSHIFT BY NV ENERGY

Energy costs are a considerable operating expense for many businesses. NV Energy's commercial energy services offer technical assistance and cost incentives for energy-efficient equipment and lighting products that save energy and lower utility bills. In addition, many energy efficiency measures reduce maintenance demands and improve comfort.

How It Works
Select a project from a prescriptive list of measures or propose a custom project with verifiable energy savings.

- Incentives are available to eligible facility owners, installers, installers and new construction projects.
- Prescriptive measures include lighting retrofits, commercial kitchen equipment, HVAC and variable frequency drives (VFD).

Project Ideas
Here are just a few project ideas from our prescription program:

- To 17% performance, discount for retrofits, LED and CFL energy high occupancy buildings with high lighting loads.
- Most commercial buildings (177,000 sq ft) have energy conservation measures in place.
- Change lighting levels to reduce lighting loads.

Because you can never save too much.

We're here to assist you - just call a PowerShift energy advisor at 800.342.6335, send us an email or visit www.nvenergy.com/commercial.

Project Snapshot

Las Vegas summers are challenging. Large shopping malls need to maintain customer comfort in buildings with variable occupancy and large open spaces. Additionally, running all of a facility's rooftop units at the same time

creates a surge in demand reflected in the demand charge on the electricity bill. Galleria at Sunset faced such challenges and sought an energy-saving solution.

NV Energy's PowerShift energy advisors offered Galleria at Sunset a solution that uses energy more efficiently and reduces peak demand. The Galleria quickly signed up to participate and received Encycle demand-limiting controllers for 13 rooftop air conditioning units. During the summer of 2015, Galleria at Sunset participated in all of the scheduled community energy events. Each event reduced the demand by approximately 60 kW for two hours.

NV Energy residential customers qualify for a FREE In-Home Energy Assessment to help you save money on your power bills. A PowerShift energy advisor will visit your home and provide you with personalized tips on how to save energy and money. Email powershift@nvenergy.com with your name, home address and contact number to schedule your appointment.
