Schedule No. GS-2-TOU MEDIUM GENERAL SERVICE - TIME-OF-USE

APPLICABLE

This schedule is applicable to all service where monthly metered maximum demand during any period is equal to or greater than five hundred (500) kW and less than one thousand (1,000) kW and where another schedule is not specifically applicable. This Rate Schedule is differentiated by the following voltage levels at the Customer's effective point of delivery:

Secondary (less than or equal to 600 volts); Primary (greater than 600 and less than 25,000 volts); and High Voltage Distribution or Transmission (greater than or equal to 25,000 volts).

TERRITORY

Entire Nevada Service Area, as specified.

RATES

The charges applicable to this rate schedule are set forth in the currently effective Statement of Rates and are incorporated herein by reference. Bundled rates can be found beginning on PUCN Sheet No. 63G. Distribution-only rates can be found beginning on PUCN Sheet No. 63M.

MINIMUM CHARGE

The minimum charge for service hereunder shall be the Basic Service Charge, Additional Meter Charge, and Customer Specific Facilities Charge if applicable.

LATE CHARGE

The Utility may charge a fee as set forth in Schedule MC for the late payment of a bill.

SPECIAL CONDITIONS

- 1. **UEC.** The Universal Energy Charge (UEC), pursuant to NAC 702.150 through 702.450, will go to fund the Nevada fund for energy assistance and conservation. Under certain circumstances, Customers will be refunded amounts paid in excess of \$25,000 per calendar quarter. The Commission will administer the collection of the UEC, certify exemptions, and administer refunds. Exemptions are generally kWh sold to:
 - a) Any governmental agency, including the State of Nevada and any political subdivision thereof, and
 - b) Any Customer using electrolytic-manufacturing processes.

Except as provided above, all kWh sold are subject to the charge. The UEC is not subject to the charges applicable under the Tax Adjustment Charge.

3.	Power Factor Adjustment. The power factor adjustment shall be at a rate of \$0.0014 per kvarh. The rate shall be applied to the difference between actual kvarh and the kvarh equivalent to a ninety percent (90%) power factor level. If the actual kvarh are greater than kvarh equivalent to a ninety percent (90%) power factor, then the adjustment shall be a charge to the Customer. Kvarh equivalent to a 90% power factor level shall be estimated as 0.484 times total billed kWh during the billing period.					
4.		Except where multiple metering points are provided at the Utility's er readings shall not be combined for billing hereunder.				
5.	Billing Demand / Demand Charge. For the billing period, the Billing Demand upon which the Demand Charge is applied is the Customer's average kilowatt load measured during the fifteen-minute period of maximum use during the respective Time of Use Period, unless otherwise specified by contract. In instances, however, where the use of energy by a customer is intermittent or subject to violent fluctuations, a shorter time interval may be used and the demand determined from special measurements. At Utility's option, a thermal type of demand meter which does not reset after a definite time interval may be used for demand measurements.					
6.	<u>Billing Demand / Facilities Charge.</u> Except as described in Special Condition 8,(Facilities Charges, Transmission Voltage Customers), the Billing Demand upon which the Facilities Charge is applied is the highest measured billing demand for the billing period.
