Attn: Docket 21-06001

1150 E. William St., Carson City, NV 89701

In its Joint Application, NV Energy seeks approval of its 2022-2041 IRP, its three-year Action Plan for 2022-2024, and its ESP for 2022-2024. The Joint Application requests that the Commission find that the cost of energy from two new company-owned renewable projects with battery storage capacity are just and reasonable and approve the network upgrades associated with the new renewable projects. Additionally, the requests for approvals include, but are not limited to, grid-tied battery storage energy systems, turbine upgrades at certain generating units, the demand side plan for 2022-2024, and the distributed resource plan for 2022-2024. Moreover, NV Energy requests expedited approval of upgrades to some of its combustion turbine fleet and deviation from NAC 704.9237(2)(f) and 704.9237(3)(b).

Pursuant to NAC 703.740 and the Commission's order in Docket No. 19-07005, NV Energy requests that the Commission consolidate this Docket with the application of SPPC for approval of its 2021 Natural Gas Conservation and Energy Efficiency Plan.

The Joint Application is available for public viewing at the Commission's website: <http://puc.nv.gov>; and at the offices of the Commission:
