PROPOSED RATE CHANGE

On March 1, 2022, Nevada Power Company d/b/a NV Energy made its annual electric Deferred Energy Accounting Adjustment (DEAA) filing with the PUCN. The filing seeks approval of fuel and purchased power expenses for the 12-month period ending December 31, 2021. The filing also seeks to reset the TRED Charge, all components of the REPR, the Base EEPRs, the Base EEIRs, the EEPAR and the EEIAR, and refund the total amount of Energy Efficiency Implementation Rate Adjustment revenue received in 2021, including carrying charges.

The effect of granting this application will be to increase overall revenue by \$21,147,193 or 0.93 percent over all rate classes.

The chart on the reverse side contains a list of customer classes and their associated proposed percentage and dollar amount changes. These rate changes are approximate and reflect the adjustments to the average monthly bill for each customer class. Actual changes to individual customers' bills will vary depending on the level of consumption. The rate changes depicted represent the company's calculation of the DEAA filing base and net of the Energy Efficiency request that will be determined prior to the consumer session or the hearings for this filing.

Ultimately the PUCN may set rates that are higher or lower than those requested by the company.

The application is available for public viewing at the Commission's website: <https://puc.nv.gov> or at the offices of the Commission as noted.
