FALL 2024

QUALIFIED APPLIANCE REPLACEMENTS

FREE Appliance Upgrade

Upgrade your appliances for free with NV Energy's Qualified Appliance Replacement program, which offers eligible customers the chance to upgrade old appliances at no cost. The program is open to both homeowners and renters, and applying is simple. Visit nvenergy.com/qar for more information and to apply.

Save More with ESAP

NV Energy's Expanded Solar Access Program (ESAP) makes tapping into solar energy a possibility at no added cost. If you rent or live in a multi-family home, or own a business or nonprofit, you may be able to enjoy the benefits of solar power without the cost of installing solar panels. ESAP participants are currently saving 8 to 13 percent on the cost of their electric consumption. Visit nvenergy.com/esap to learn more and apply by October 31.

You could save money on your bill by changing your habits and using less energy during times of the day when demand is the highest. Customers who participate in time-of-use (TOU) are rewarded with a lower energy rate during off-peak hours than the standard flat rate. Visit [nvenergy.com/tou](https://www.nvenergy.com/tou) to learn more and log on to MyAccount to see your personalized savings comparison.

A top-down view of various survival and medical supplies laid out on a dark, textured wooden surface. The items include a black first aid kit with a red cross, two clear plastic water bottles, a grey sock, a yellow coiled rope, a red backpack, a white tin container, a brown paper folder, a digital thermometer, a multi-tool, a flashlight, a compass, a small bottle of pills, a fork, a knife, a comb, and several other small tools and containers.
