

This is what we do  
NV Energy.

SPRING 2026

## The Benefits of Solar, No Panels Required

NV Energy's Expanded Solar Access Program (ESAP) provides solar energy to customers who, due to income limitations, are unable to install a private solar system at their residence. This clean energy is served through a mix of utility-scale solar and community based solar resources. ESAP participants are guaranteed a lower rate for energy consumption than the standard rate. Applications are accepted April 1 through May 31, 2026. Visit [nvenergy.com/esap](https://www.nvenergy.com/esap) to see if you qualify and to apply.

## Preparing for Fire Season

As we head into spring and temperatures begin to warm, the risk of wildfire also starts to increase. NV Energy remains committed to keeping our communities safe through our Power Safe NV program. We've strengthened our system with year-round wildfire mitigation work, including enhanced inspections, targeted vegetation management, and upgrades in high-risk areas to help improve resilience ahead of fire season.

Just as NV Energy prepares, we encourage customers to take steps toward their own seasonal readiness:

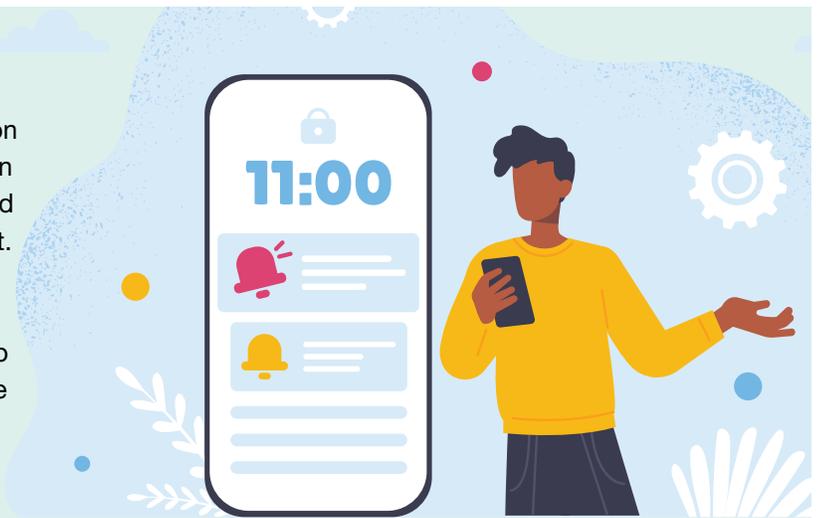

- **Update your contact preferences in MyAccount** to ensure you receive important safety and outage alerts. Visit [nvenergy.com/myaccount](https://www.nvenergy.com/myaccount) to review your preferences.
- **Enroll in the Green Cross program**, if applicable, so we are aware of any special medical needs at your home during emergencies. Visit [nvenergy.com/greencross](https://www.nvenergy.com/greencross) to learn more.
- **Learn more about our wildfire mitigation strategies** — including fire season settings, Public Safety Outage Management (PSOM) and emergency de-energization — by visiting [nvenergy.com/powersafe](https://www.nvenergy.com/powersafe).

Even with ongoing improvements and extensive wildfire preparation efforts, extreme weather conditions can still lead to outages. We encourage customers to plan ahead and review helpful tips and resources at [nvenergy.com/outageprep](https://www.nvenergy.com/outageprep).

## Stay Connected

We want to ensure you have up to date information about your account, planned work, and outages in your area. Make sure your contact information and communication preferences are set in MyAccount. Not only will you receive outage updates, but you can also customize other information delivered to your account like cost and usage alerts. Log on to [nvenergy.com/myaccount](https://nvenergy.com/myaccount) to update your profile and preferences.

## AC Tune-Up

PowerShift's AC Tune-Up program is here to help you stay comfortable and save energy as temperatures rise. Regular AC maintenance helps improve system performance, reduce energy use, and keep summer bills in check. Customers in southern Nevada can connect with participating contractors now, and northern Nevada customers will be able to participate beginning in June. Visit [nvenergy.com/ac](https://nvenergy.com/ac) to view the contractor list and get started on your low or no-cost AC Tune-Up.

**GET THE DIRT  
BEFORE YOU DIG.  
CALL 811.**

Before beginning your spring planting or home improvement projects, call 811 to have utility lines marked. 811 is the official nationwide phone number to call before you dig to locate underground utility lines, including gas pipelines and electric lines. It's free, required by law, and can help prevent damage and possible injury. Learn more about 811 at [nvenergy.com/call811](https://nvenergy.com/call811).
