PROPOSED RATE CHANGE

On February 27, 2026, Sierra Pacific Power Company d/b/a NV Energy filed its annual electric Deferred Energy Accounting Adjustment (DEAA) filing with the PUCN. The filing seeks approval of fuel and purchased power expenses for the 12-month period ending December 31, 2025. The filing also seeks to reset the TRED Charge, all components of the REPR, the Base EEPRs, the Base EEIRs, the EEPAR, the EEIAR and the ESPC.

The effect of granting this application will be to increase overall revenue by \$9,357,169 or 0.95 percent, over all rate classes.

The following chart contains a list of customer classes and their associated proposed percentage and dollar amount changes. These rate changes are approximate and reflect the adjustments to the average monthly bill for each customer class. Actual changes to individual customers' bills will vary depending on the level of consumption. The rate changes depicted represent the company's calculation of the DEAA filing and net of the Energy Efficiency request that will be determined prior to the Consumer Session or the hearing for this filing.

Ultimately the PUCN may set rates that are higher or lower than those requested by the company. The company's applications are available for review online at nvenergy.com/rates and puc.nv.gov.
