

This is what **we do**
NVEnergy.

FALL 2026

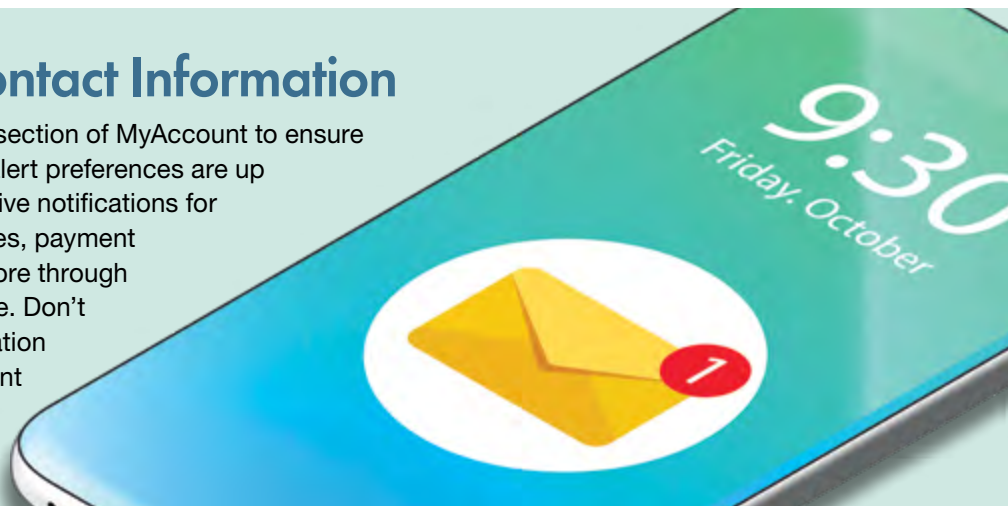

The sun works for you, too.

Enrollment is open for our Expanded Solar Access Program (ESAP), which provides income-qualified residential customers with access to solar energy at a guaranteed lower rate, no panels required. ESAP participants are currently saving more than 8 percent on the cost of their electric use. Visit nvenergy.com/esap to learn more and apply by October 31.

Update Your Contact Information

Visit the Profile & Preferences section of MyAccount to ensure your contact information and alert preferences are up to date. You can select to receive notifications for planned and unplanned outages, payment confirmation, due date, and more through email, SMS and voice message. Don't miss out on immediate information and updates about your account and services.

Green Cross

We care about the safety of our customers. If you or someone in your household depends on electricity for medical equipment, you are encouraged to enroll in the Green Cross program. Green Cross enrollment does not prevent outages, but it does help us prioritize restoration efforts and provide additional assistance when possible. Visit nvenergy.com/greencross to learn more and complete your enrollment.

Free Pool Pump Winterizations

Make sure you're getting the most savings possible by having your pool pump calibrated for FREE!

- An approved pool professional will calibrate your qualified, variable speed pool pump to circulate water at an appropriate speed based on the size of your pool.
- The proper calibration of the high- and low-speed settings will save you energy and money.

Winter calibration eligibility:

- Resident must be an NV Energy customer.
- The qualified, variable speed pool pump must be installed on a single-family residential in-ground swimming pool.
- Pool pump is eligible for one winterization calibration per year and must be installed for a minimum of 12 months prior.

Visit nvenergy.com/poolpump for full eligibility requirements. Offer is available through November 15, 2026.

Stay Vigilant to Avoid Scams

NV Energy reminds customers to stay vigilant and be on the lookout for scams. Common practices include web searches that yield fake websites and contact information. Scammers trick customers into sharing their personal information under the guise of setting up service or making payments to NV Energy. Scammers sometimes also contact customers directly, threatening to turn off service if payment isn't made. Always do business with us directly, whether through MyAccount at nvenergy.com or by calling Customer Service.
