

2018-01-09

## ON PRICE

We work hard to keep our customers' rates low, fair and stable. In fact, according to the U.S. Energy Information Administration,\* Nevada's average retail price for all customers was 45% lower than California, 8% lower than other mountain states and 17% lower than the national average. And, the rate you pay today is 15% lower than in 2009.

## ON A SUSTAINABLE ENVIRONMENT

Between 2005 and 2015, Nevada tripled its in-state renewable energy production and reduced carbon emissions in the electricity sector by 44%. Today, you are receiving even more clean energy with a total of 50 projects statewide. That's enough renewable energy to power more than a million homes at once.

# ON ENERGY SAVINGS

When you have the right power tools, the job gets a lot easier. At NV Energy, our job is to help you make your home or business more energy efficient. That's why we've created PowerShift — all the tools you need to save energy and money.

“ I love being able to check the smart thermostats in our salons 24/7 from the app on my phone. It helps me manage our energy use while keeping our customers and staff comfortable. I can also adjust the temperature in one of our salons from my phone and that's really convenient.

— Donna Catalfamo  
Owner, Posaré Salons

# ON OUR COMMUNITIES

On average, employees have been with NV Energy for 14 years. That's because we're not only committed to our jobs, we're a part of the community. We're proud to give our time and financial resources to improve the lives of our fellow Nevadans. Over the last two years, NV Energy employees, our company and the NV Energy Foundation, gave more than \$10 million\* to charitable organizations who help those in need. Our Power of Good employee volunteers also donated nearly 78,000 hours of their own time to various causes throughout Nevada.
