

Schedule LGS - 3
LARGE GENERAL SERVICE - 3

APPLICABLE

This Schedule is applicable for all non-Residential Service where consumption of energy exceeds 3,500 kWh and where the Billing Demand is equal to or greater than 1,000 kW in any one of the current or prior 11 months and for which no specific schedule is provided. Not applicable to standby, resale, temporary, shared, or mixed class of service. Not applicable to supplemental service unless the Customer is a Qualifying Facility under Title 18, Code of Federal Regulations, Section 292.201 through 292.207.

(D)
(D)

TERRITORY

Entire Nevada Service Area, as specified.

RATES

The charges applicable to this rate schedule are set forth in the currently effective Statement of Rates and are incorporated herein by reference. Bundled rates can be found beginning on PUCN Sheet No.10. Distribution-only rates can be found beginning PUCN Sheet No.10K.

MINIMUM CHARGE

The minimum charge for service hereunder shall be the sum of the Basic Service Charge, the Additional Meter Charge, and all Facilities Charges, including Customer Specific Facilities Charges.

LATE CHARGE

The Utility may charge a fee as set forth in Schedule MC for the late payment of a bill.

SPECIAL CONDITIONS

1. **UEC.** The Universal Energy Charge (UEC), pursuant to NAC 702.150 through 702.450, will go to fund the Nevada fund for energy assistance and conservation. Under certain circumstances, Customers will be refunded amounts paid in excess of \$25,000 per calendar quarter. The Commission will administer the collection of the UEC, certify exemptions, and administer refunds. Exemptions are generally kWh sold to:

Schedule LGS - 3
LARGE GENERAL SERVICE - 3
(Continued)

SPECIAL CONDITIONS (Continued)

1. **UEC.**(Continued)

- a) Any governmental agency, including the State of Nevada and any political subdivision thereof, and
- b) Any Customer using electrolytic-manufacturing processes.

Except as provided above, all kWh sold are subject to the charge. The UEC is not subject to the charges applicable under the Special Supplementary Tariff.

2. **Time-of-Use (TOU) Periods.** Daily time periods will be based upon Pacific Standard Time/Pacific Daylight Time and are defined as follows:

Effective January 1, 2024

Summer Period (June – September)

On-Peak 3:01 p.m. – 9:00 p.m. Daily

Off-Peak All Other Hours

Winter Period (October - May)

All Winter Hours

The summer period will consist of four regularly scheduled billing periods for service provided in the months of June through September. The winter period will consist of eight regularly scheduled billing periods for service provided in the months of October through May.

3. **Power Factor.** The power factor adjustment shall be at a rate of \$.0010 per kvarh for the Winter months (October – May) and a rate of \$.0020 per kvarh for the Summer months (June – September). The rate shall be applied to the difference between actual kvarh and the kvarh equivalent to a ninety percent (90%) power factor level. If the actual kvarh are greater than the kvarh equivalent to a ninety percent (90%) power factor, then the adjustment shall be a charge to the Customer. The kvarh equivalent to a 90% power factor level shall be estimated as 0.484 times total billed kWh during the Billing Period.

4. **Meter Readings.** Except where multiple metering points are provided at the Utility's convenience, meter readings shall not be combined for billing hereunder.

Schedule LGS - 3
LARGE GENERAL SERVICE - 3
(Continued)

SPECIAL CONDITIONS (Continued)

5. **Billing Demand / Demand Charge.** For the billing period, the Billing Demand upon which the Demand Charge is applied is the Customer's average kilowatt load measured during the fifteen minute period of maximum use during the respective Time of Use Period, unless otherwise specified by contract. In instances, however, where the use of energy by a customer is intermittent or subject to rapid fluctuations, a shorter time interval may be used and the demand determined from special measurements. At Utility's option, a thermal type of demand meter which does not reset after a definite time interval may be used for demand measurements.
6. **Billing Demand / Facilities Charge.** Except as described in Special Condition 9, below, the Billing Demand upon which the Facilities Charge is applied is the highest Customer Billing Demand for the Billing Period and the prior twelve (12) Billing Periods.
7. **Seasonal Usage.** The Facilities Charge is designed to recover annual costs on a monthly basis. Seasonal usage, where the Customer requests to disconnect and subsequently reconnect service, will result in the assessment of any minimum bills for the period of disconnection in the first bill following reconnection.
8. **Line Voltage.** Utility retains the right to change its line voltage at any time.
9. **Facilities Charges, Transmission Voltage Customers.** Facilities Charges for Customers receiving service at transmission-level voltages will be calculated based upon:
- a) Customer-specific investments by the Utility using the Facilities Charge per dollar of Utility investment identified in the Statement of Rates; and
 - b) Customer-specific investments contributed to the Utility using the Facilities Charge per dollar of contributed investment identified in the Statement of Rates.

The facilities charge and the Customer specific investment amounts identified above will be updated in each General Rate Case ("GRC") for all transmission voltage Customers. Between GRCs the Utility will establish or revise Customer specific investment amounts for new or existing Customers as service changes occur, and will bill the applicable Customers at the established Facilities Charge per dollar of contributed investment.

In the event that a Customer specific investment amount cannot be identified for the Customer when service commences, the standard per kW Facilities Charge identified in the Statement of Rates will be applied by the Utility for billing purposes until the Customer specific investment is determined. The per kW Facility charge will be used on a temporary basis only until the information for the Customer-specific facility investment can be developed for the Customer.
