

NV Energy Brings Solar Energy and Low Rates to Customers

Since its merger with Berkshire Hathaway Energy in December 2013, NV Energy has a proven record of reducing carbon emissions and advancing renewable energy development all while reducing rates for customers.

- Since 2013, NV Energy has fully eliminated its ownership of coal generation serving southern Nevada and will retire its one remaining coal-fueled plant in northern Nevada by 2025.
- NV Energy's utilization of coal to meet Nevada's energy needs has decreased from nearly 18% in 2013 to approximately 4% today.

- NV Energy has exceeded the Nevada renewable portfolio standard for 10 years straight and supports increasing the renewable portfolio standard to 50% by 2030, with renewable energy development growing 348% since 2013.
- The company has a long-term goal of serving customers with 100% renewable energy.

- NV Energy supports customers electing to install rooftop solar.
- More than 61,144 customers have installed rooftop solar generation systems on their homes or businesses, representing a 1,775% increase in installations since 2013.

- NV Energy has not requested an increase in the rates charged to customers from the Public Utilities Commission of Nevada since 2013.
- Customers today pay nearly 10% less for energy than they did in 2013 while being served with more carbon-free renewable energy.

The real facts: NV Energy is a leader in powering the lives of its customers with reliable, sustainable and affordable energy.
