Solar Space Heating

1. In northern Nevada, customers will spend hundreds of dollars annually in heating costs. Solar space heating systems are an effective and excellent way to reduce your energy bills during long winter months. [Learn more](#) about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
2. Solar air collector space heating systems work alongside your current heating system to use the sun's energy to reduce your energy consumption. Reducing your energy usage will result in lower heating bills, giving you real dollar savings throughout the entire winter. [Learn more](#) about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
3. Like other renewable energy systems, solar space heating systems minimize the environmental effects of enjoying a comfortable, modern lifestyle. [Learn more](#) about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
4. By using a solar space heating system, you can take advantage of the sun's abundant energy to heat your home. A solar heating system will also reduce the amount of air pollution and greenhouse gases that result from your use of fossil fuels for heating. [Learn more](#) about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
5. Solar heating technology is well-proven for both residential and commercial applications. Systems are highly durable, with warranties of 10 years and expected operating lives of over 20 years. [Learn more](#) about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
6. Did you know that NV Energy has incentives available to natural gas customers for the installation of solar heating systems? Residential, small business, schools and public building customers are eligible to apply. Incentives are issued on a first come, first served basis. Get yours before they are gone. [Learn more](#)
7. Consider the eco friendly supplemental space heating option of a solar thermal air heating system before you plug in that electric space heater. [Learn more](#) about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
8. Do you belong to a church, club or other non-profit organization looking to lower their heating costs this winter? [Click here](#) to learn more about NV Energy incentives available to offset the costs to purchase and install a qualifying solar space heating system.
