

Electric Vehicle Incentives

COMMERCIAL

Custom Grant Program

The EV Custom Grant Program has up to \$ 1 million in incentives available through a competitive grant to provide financial support to non-residential electric vehicle charging infrastructure development that may not be identified in, or eligible for, other incentives offered through the NV Energy electric vehicle charging stations incentive programs.

Preferred projects will bring forth creative electrification solutions that demonstrate strong project feasibility, sound project financials, and provide long-term value to the community and the state of Nevada by delivering the benefits of the growing electric transportation sector. NV Energy can help you check your project's eligibility and feasibility through technical advisory services available to all interested customers. Call **866-786-3823** or send us a message at **cleanenergy@nvenergy.com**.

Application Timeline

APPLICATION CUTOFF	NV ENERGY REVIEW	AWARD
