¹ The clean energy programs are the renewable energy (solar, solar thermal, wind, and hydro), energy storage, and electric vehicle charging station incentives programs administered by NV Energy under the laws of the Nevada Legislature and regulated by the Public Utilities Commission of Nevada.

Solar PV

Program Applications Update

The solar incentives program is fully subscribed. In June, zero applications were closed out.

	North	South	North	South	North	South
Low Income Solar Energy Program	\$1,062,461	\$2,342,983	600	1,506	41	24

¹ LISEP payments began June 1, 2018 and have an incentive cap of \$1 million per year, for up to six years, as designated in Senate Bill 145.

Solar PV / LISEP

Solar PV / LISEP Incentives Capacity Installed by Month (kW)¹

Solar PV / LISEP Incentives Paid Since July 1, 2010

Spending Toward \$295,270,000 Cap	
	314,356

Average Solar PV / LISEP Incentives Installation Cost Per Watt AC-CEC

Cost Per Watt		
Year	UFI/EPBB	PBI
2021	\$4.23	\$0.00
2022	\$4.28	\$0.00

¹ **Solar PV / LISEP Incentives Capacity Installed by Month (kW)** chart represents interconnected incentivized capacity, which are applications that have received permission to operate, by the month they were interconnected. The **Solar Incentives Applications Completed Capacity by Month (kW)** chart, which represented total interconnected incentivized capacity only after administrative tasks have been completed to close out an application, has been removed.

Solar Thermal Heating (Northern Nevada Gas Customers)

Program Applications Update

In June, the solar thermal heating incentives program received zero applications and zero applications were closed out.

¹ **Clean Energy Programs Incentive Applications Summary** table (originally named Clean Energy Programs Incentive Summary) excludes the portion of funds that are planned to be paid for by the Governor's Office of Energy (GOE) incentive funds.

² **Incentives Paid** are program dollars from applications that have been paid and the application closeout process completed, plus performance-based incentive payments recorded in the application system.

³ **Incentives Reserved** are program dollars from applications that have an active Reservation and are either still active or the application closeout process has not yet been completed, plus the balance of what is left to pay for performance-based incentive projects.

⁴ **Incentives Available** are program dollars that are not assigned as paid or reserved as defined in footnotes 2 and 3.

⁵ **Incentives Total** are the total program dollars allotted for each program as of the end of the month.

⁶ **Pending Activity** shows the variance between application system records and general ledger records (and vice versa). Any variances will be explained in the **Monthly Report Variances** section starting on page 17.

⁷ **Clean Energy Programs Incentive Tracking Summary** table represents a summary of general ledger activity following generally accepted accounting principles (GAAP) and application activity that includes all current and pending liabilities (submitted, but not yet obligated funds).

⁸ **Incentives Disbursements** are funds that have been vouchered according to the general ledger.

⁹ **Incentive Liabilities** are funds that have been obligated for payment for projects issued a Reservation and are still active, plus the balance of what is obligated for performance-based incentive projects.

¹⁰ **Incentive Availability** are currently unobligated funds.

¹¹ **Incentives Submitted** are funds for applications that have been submitted but not yet approved for an incentive reservation. This also includes applications that have received conditional reservations, which are reservations for payment only if funds become available for that program.

¹² **Remaining Availability** are unobligated funds available for new applications.

Solar PV

Program Applications Summary Monthly Detail

In June, \$44,379 was paid out and \$0 was reserved. There was \$0 of attrition and \$0 of newly available funds allocated to the energy storage incentives program.¹

Legislation, Regulation, and Compliance

On June 3, 2022, NV Energy hosted its Dealer Partner Workshop at the Las Vegas Chamber of Commerce. NV Energy partnered with the Nevada Franchised Auto Dealers Association to discuss with attendees: Federal, state, and NV Energy incentives for dealerships and customers; NV Energy resources and free technical assistance; and information concerning NV Energy's Nevada Electric Highway and Public Charging around Las Vegas.

On June 23, 2022, NV Energy held its second Solar Stakeholder meeting in-person and virtually for the July 1, 2021-June 30, 2022, program year. There were 91 attendees and topics included damage prevention awareness, gas lines safety, the importance of Call Before You Dig, updates on the Clean Energy Programs, and a question-and-answer session at the end.

All sites for Nevada Electric Highway have been completed. Electric Vehicle Custom Grant and Lower Income Electric Vehicle programs concluded on June 30, 2022.

After June 30, 2022, the Lower Income Solar Energy Program closed for new applications and will be only performing payments to current active reservations.

Please find a table with status for different Nevada electric highway sites:

Site # on GOE Map	Highway	Site Location	Status
1	I-15	Jean	Completed
2	I-15	I-15 / U.S. 93 Jct	Completed
6	I-80	I-80 / U.S. 95 Jct	Removed
17	U.S. 95	Schurz	Completed
18a	U.S. 95	Luning	Completed
19	U.S. 95	Coaldale	Removed
20	U.S. 95	Goldfield	Completed
7	I-80	Lovelock	Removed
8	I-80	Rye Patch	Completed
10	I-80	Valmy	Removed
24	U.S. 50	Silver Springs	Completed
25	U.S. 50	Middlegate	Completed
26	U.S. 50	Cold Springs	Completed
27	U.S. 50	Austin	Completed

Monthly Report Variances

Continual data reconciliation of the application portal data and decimal rounding will result in marginal variances between reports and any significant variances will be explained.

On Page 11:

There is \$220,035 of pending activity in incentive disbursements:

- \$125,987 of LISEP disbursements are pending GOE reimbursement.
- \$1,500 of Storage disbursements are pending a bank credit.
- \$92,547 of EV disbursements are pending GOE reimbursement.

There is \$324,812 of pending activity in incentive liabilities:

- \$291,830 of LISEP liabilities are reservations that will be reimbursed by GOE, if paid.
- \$32,982 of EV liabilities are reservations that will be reimbursed by GOE, if paid.

Workshops, Meetings, and Events

The clean energy programs staff held the following event(s) where they handed out brochures and/or answered questions from the attendees:

- June 03, 2022 → Dealer Partner Workshop; Las Vegas
- June 23, 2022 → Solar Stakeholder Meeting; Las Vegas/Virtual
