The clean energy programs are the renewable energy (solar, solar thermal, wind, and hydro), energy storage, and electric vehicle charging station incentives programs administered by NV Energy under the laws of the Nevada Legislature and regulated by the Public Utilities Commission of Nevada.

Solar PV

Program Update

The solar incentives program is fully subscribed. In May, four incentive applications were closed out.

May						
	Incentives Paid		Completed kW		Completed Applications	
	North	South	North	South	North	South

The following definitions apply to all Program Update pages:

Incentives Paid program dollars are a sum from completed solar incentive applications plus performance-based incentives (PBI) payments paid to date.

Completed kW capacity is a sum from completed solar incentive applications plus PBI projects that have interconnected.

Completed Applications include applications where the system has interconnected, the check issued and mailed, and all administrative tasks completed to close out the application in the online application portal plus PBI projects that have interconnected.

Low Income Solar Energy Program (LISEP)

Program Update

In May, LISEP received zero applications and were zero application closed out.

May					
	Incentives Paid		Completed Capacity (kW)		Completed Applications
	North	South	North	South	North South
Low Income Solar Energy Program	\$0	\$0	0	0	0 0

Calendar Year to Date					
	Incentives Paid		Completed Capacity (kW)		Completed Applications
	North	South	North	South	North South
Low Income Solar Energy Program	\$38,119	\$71,685	27	40	1 1

Inception (2018) to Present

	North	South	North	South	North South
Low Income Solar Energy Program	\$333,426	\$1,008,547	203	701	6 14

LISEP began accepting applications on July 1, 2018 and have an incentive cap of \$1 million per year, for up to six years, as designated in Senate Bill 145.

Solar PV / LISEP

Solar PV / LISEP Incentives Capacity Installed by Month (kW)

Solar PV / LISEP Incentives Paid Since July 1, 2010

Spending Toward \$295,270,000 Cap		
	Incentives Paid	Completed kW
Total	\$242,929,785	313,821

Average Solar PV / LISEP Incentives Installation Cost Per Watt AC-CEC

Cost Per Watt		
Year	UFI/EPBB	PBI
2020	\$4.46	\$2.90
2021	\$4.20	\$0.00

Solar PV / LISEP Incentives Capacity Installed by Month (kW) chart represents interconnected incentivized capacity, which are applications that have received permission to operate, by the month they were interconnected. The Solar Incentives Applications Completed Capacity by Month (kW) chart, which represented total interconnected incentivized capacity only after administrative tasks have been completed to close out an application, has been removed.

Solar Thermal Heating (Northern Nevada Gas Customers)

Program Update

In May, the solar thermal heating incentives program received zero applications and there were no applications closed out.

Renewable Energy Generating Systems Capacity Completed Since July 1, 2010 and Reserved

Solar PV, LISEP, Wind, and Hydro Programs Capacity Summary			
	Capacity (kW)	Capacity (kW)	Capacity (kW)
	Completed	Reserved	Total
Solar PV	312,918	71	312,989
LISEP	904	1,101	2,005
Wind	10,003	0	10,003
Hydro	1,346	0	1,346
Total	325,171	1,173	326,344

The following definitions apply to all Program Summary Monthly Detail pages:

Incentives Paid program dollars are from completed incentive applications plus performance-based incentives (PBI) paid to date.

Incentives Reserved are the maximum approved program dollars reserved for applications that have received a Reservation Notice and have not been closed out, plus the balance between approved PBI program dollars reserved and paid to date.

Incentives Available program dollars have not yet been reserved or paid out. This also includes Solar PV program dollars from applications, which were submitted but not reserved prior to the program becoming fully subscribed.

Newly Available program dollars are the difference between the maximum reserved incentive amount and the actual incentive amount paid from completed applications or ineligible applications.

Incentives Attrition program dollars are previously reserved funds, from approved applications that received a Reservation Notice, until the application progressed into a Cancelled, Withdrawn, or Forfeited status, as defined by NRS code 701B.255.

All Program Review pages detail program spending to date toward \$295,270,000 incentive cap.

Solar PV

Program Summary Monthly Detail

In May, \$115,150 was paid out and \$0 was reserved. There was \$979 of attrition made available to LISEP. There was \$160,409 of newly available funds made available to the energy storage incentives program.

Beginning May Balance					
	Incentives Paid		Incentives Reserved		Incentives Available

Legislation, Regulation, and Compliance

The table below shows the status of all the Nevada Electric Highway Sites:

Site # on GOE Map	Highway	Site Location	Status
1	I-15	Jean	Completed
2	I-15	I-15 / U.S. 93 Jct	Construction
6	I-80	I-80 / U.S. 95 Jct	Site Selection
17	U.S. 95	Schurz	Completed
18a	U.S. 95	Luning	Completed
19	U.S. 95	Coaldale	Removed
20	U.S. 95	Goldfield	Completed
7	I-80	Lovelock	Removed
8	I-80	Rye Patch	Procurement
10	I-80	Valmy	Removed
24	U.S. 50	Silver Springs	Closeout
25	U.S. 50	Middlegate	Construction
26	U.S. 50	Cold Springs	Completed
27	U.S. 50	Austin	Completed

The construction for the Motel 6 site located at the Las Vegas Speedway is currently in progress and anticipated to complete by the end of July 2021. For the site located at Middlegate, NV Energy is utilizing an off-grid solution comprised of a solar array, battery storage solution and EV chargers. This is due to the high cost of the line extension to the site which could have rendered the project as infeasible. The EV charging solution for this site is currently being pre-assembled in a shop and will be shipped and installed by the end of June 2021. For the site located at Rye Patch State park, NV Energy is currently in process of obtaining the land easements from the State prior to the start of construction.

Governor Steve Sisolak and NV Energy leadership visited the solar system project at a Carson City apartment complex serving lower income veterans and other lower income customers. This project received incentives from NV Energy and the Governor's Office of Energy through the Lower Income Solar Energy Program ("LISEP") to install a 122-kW solar system, estimated to supply one third of the annual electricity usage for the apartment complex. The incentives covered almost 50 percent of the total project cost.

Monthly Report Modifications

Continual data reconciliation of the application portal data and decimal rounding will result in marginal variances between reports and any significant variances will be explained.

Workshops, Meetings, and Events

The clean energy programs staff held the following event(s) where they handed out brochures and/or answered questions from the attendees:

- There were no workshops, meetings, or events in May.
