Legislation, Regulation and Compliance

# Legislation, Regulation and Compliance

NV Energy filed an advice letter with the Public Utilities Commission of Nevada (Commission) on July 27, 2016. Per the filing: “The purpose of the advice letter is to implement modifications that will allow NV Energy customers who have installed private solar or had a complete, active and approved application to interconnect a private generation system pending on December 31, 2015, to operate their private solar system pursuant to the rules that were in place prior to the decision of the Commission in Docket Nos. 15-07041 and 15-07042.” NV Energy believes the tariff modifications present a balanced approach that is in the public interest. If adopted by the Commission, the approximately 32,000 private solar customers affected by grandfathering would be provided with immediate assurance that the terms under which they agreed to install their solar systems will be maintained for 20 years. NV Energy requested that the Commission approve the proposed tariff no later than 90 days from the filing date and make the tariff effective 60 days after the date the Commission issues an order accepting the tariff changes.

# Workshops, Meetings, and Events

No workshops, meetings or events to report in July.
