Smart Thermostat **ENHANCED**

How to use your Smart Thermostat Enhanced.

How to adjust temperature and change mode.

The large number is the present temperature.

The small number is your desired temperature.

1. Tap the display screen to wake your thermostat.
2. To change the temperature, tap on the [+] to increase or [-] to lower temperature.
3. Your set temperature will appear below the main temperature display with the word "holding".
4. To change the mode setting, tap the Mode Setting button at the top.
5. Select Heat, Cool or Auto mode.

How to set up Home, Away, and Sleep mode.

Your thermostat comes with a default schedule. The Home comfort setting starts at 6:30am and the Sleep comfort setting temporarily adjusts the temperature at 11:30pm to help you save money overnight. Here's how to create your own schedule:

1. Open the ecobee mobile app.
2. Tap "Your thermostat" along the top left of the screen.
3. Tap the main menu at the bottom left of the screen.
4. Tap "Schedule".
5. Tap the "+" sign at the top right of the screen.
6. Select a temperature range for when you're home, away, or asleep.

How to connect to Wi-Fi and register.

1. On your thermostat, select the ≡ icon, then select the ⚙ icon.
2. Select Registration > Continue > Wi-Fi Settings.
3. Follow the steps on the screen to connect to Wi-Fi.
4. On your phone, download the ecobee app on Google Play or the App Store.
5. Open the app and sign in or create your account.
6. Select the ⊕ icon in the top right corner followed by Add a device.
7. Select Thermostat followed by Yes, it is installed.
8. Enter the registration code found on your thermostat screen.

When you're done entering your home details, select **Show me my thermostat** to start controlling your new smart thermostat from anywhere with the ecobee app.
